

Project status and next steps

Memoria Judaica website - handover sheet

Status of the Memoria Judaica website at the end of this working session. Use this sheet to continue in a new conversation: upload memoria-judaica-site.zip (it holds the newest source) and tell the assistant what to change.

Where things are

What	Where
Live preview (current state, private to the owner until shared)	https://claude.ai/artifact/RsRqi4VMg4pAmm9JoRERzx
Download page with all files	https://claude.ai/artifact/3y8YpmMbvoP6fe3AZMn6ou
Older preview link (outdated, ignore)	https://claude.ai/artifact/DdmdD1VtURFCTgFYB48e4e
Source and deployment package	memoria-judaica-site.zip
Content workbook (upload to Google Drive)	Memoria-Judaica-Content.xlsx
Guides	ADMIN-SETUP-GUIDE.pdf, EDITOR-GUIDE.pdf, DOMAIN-AND-EMAIL-GUIDE.pdf
Hebrew proofreading for the couple	Hebrew-Proofreading-List-Round2.xlsx

What the website is

- React and Tailwind, packed with esbuild into static pages. German, English and Hebrew (right to left). Pages: Startseite, Projekte (Friedhöfe overview, 5 project pages, Weitere Quellen, cookbook "Imber, neglen, bomeranzén"), Team (3 profiles), Aktuelles, Kontakt, Impressum, Datenschutz. Search field in the menu bar.
- Every text comes from the Google Sheet "Memoria Judaica - Content". The editors use the menu Website > Check my entries > Publish website now. A GitHub robot builds and publishes the site. The contact form sends mail through the sheet script to the Gmail inbox.
- Design details that were decided: project tiles without photos (place name next to the map pin), photos only on project pages, Bad Kissingen with an automatic 10-photo carousel (pause button), highlighted author lines, Friedhöfe and project texts in two columns on wide screens, faint handwriting behind the cookbook text, "Coming Soon..." for projects without text, webmaster credit in the Impressum and in the footer of the Kontakt page only.

Language status

- **German:** complete.
- **English:** complete. Publication and online-edition list titles stay in their original language by design. The English texts were written by the assistant and have not been proofread by a native speaker.
- **Hebrew:** labels, home-page intro, the Friedhöfe introduction (the couple's own translation), project titles and place names, career entries and list headings exist. **Per the couple's latest feedback, the Hebrew version shows ENGLISH for: the project page texts, the page "Weitere Quellen" with the cookbook page, the project list and the events on the page**

Aktuelles (its title, intro and headings are Hebrew) the career entries and membership entries of the team members (only the headings above them are Hebrew) and the team card label "Profile and publications". Those texts can be translated later (write the Hebrew into the Hebrew column of the sheet). The first round was corrected by the couple and applied. The remaining machine-translated drafts (career entries, titles, headings) are in Hebrew-Proofreading-List-Round2.xlsx for the couple to proofread. Publication lists, online-edition lists and the Impressum / Datenschutz paragraphs stay German on purpose. "Coming Soon...", the footer credit and "Memoria Judaica" stay in English.

Open items

Who	What
Couple	Proofread Hebrew-Proofreading-List-Round2.xlsx and send it back. Decide: the Hebrew spelling of the town names, the Hebrew wording for "die guten Orte" (the good places), whether lecture titles in the events are Hebrew or German, and the Hebrew heading for "Mitgliedschaften" (memberships).
Couple	Provide the Hessian small-projects text (page shows "Coming Soon..."). Confirm credits for the Hammelburg, Laudenbach and home photos.
Couple	Confirm the Impressum entries (responsible for content, technical implementation) and the final address and e-mail.
Administrator	Buy memoria-judaica.de, set up Cloudflare DNS and mail forwarding, GitHub, the sheet script and the contact form (guides). Choose public or private code (DOMAIN guide, Step 7).
Administrator	Confirm the Gmail address (memoria-judaica@gmail.com cannot exist; the files use memoriajudaica@gmail.com).
Legal	Complete the Datenschutz text (hosting, Cloudflare, Google, contact form) and have it reviewed by a professional.
Optional	English glosses for German publication titles; Hebrew spellings of the people's names; .com and .org addresses.

Known limits

- The real GitHub, Cloudflare, domain and Google steps in the guides were written from the providers' documentation and have not been run against your accounts. The package itself was test-built from scratch.
- docs/deploy-cloudflare.yml.txt (private code on Cloudflare Pages) has not been tested.
- The preview link shows a single-file copy of the site. The real site loads its pictures as files and is lighter.
- The contact form shows a thank-you message after sending but cannot confirm delivery; the preview uses the visitor's e-mail program because no web link is set.

How to continue in a new conversation

1. Start a new chat and upload memoria-judaica-site.zip, the content workbook and this sheet.
2. Say what to change, for example "apply the corrections from the Hebrew round 2 list" and upload the returned file.
3. Ask for a refreshed ZIP, workbook, guides and download page at the end of each session, so nothing exists only in the assistant's working folder.
